

VOL. XVIII(2) 2010

PCo-A analysis of strawberry germplasm used in european breeding programs, based on evaluation of DNA polymorphism of investigated plants

Anita Kuras, Małgorzata Korbin

Identification of pear cultivars with RAPD and ISSR markers

Anna Lisek, Elżbieta Rozpara

Phenotypic diversity in a sample of blackcurrant (*Ribes nigrum* L.) cultivars maintained in the Fruit Breeding Department at the Research Institute of Pomology and Floriculture in Skierniewice, Poland

Wiesław Mądry, Stanisław Pluta, Leszek Sieczko, Marcin Studnicki

The profile of polyphenols and antioxidant properties of selected apple cultivars grown in Poland

Aleksandra Duda-Chodak, Tomasz Tarko, Paweł Satora, Paweł Sroka, Tadeusz Tuszyński

Polyphenol oxidase activity in selected apple cultivars

Krzysztof Kołodziejczyk, Joanna Milala, Michał Sójka, Monika Kosmala, Jarosław Markowski -

Chances, perspectives and dangers of GMO in agriculture

Tomasz Twardowski

The influence of mycorrhizal fungi on the growth and yielding of plum and sour cherry trees

Sławomir Świerczyński, Aleksander Stachowiak

Effect of plant growth regulators on apple fruit preharvest drop and quality

Nomeda Kvikliene, Darius Kviklys, Audrius Sasnauskas

The usefulness of dikegulac in propagation of highbush blueberry (*Vaccinium corymbosum* L.) 'Herbert'

Wojciech Litwińczuk, Agata Prokop

Evaluation of the direct and subsequent influence of a supersorbent polymer on cropping and rate of gas exchange of strawberry (*Fragaria ananassa* Duch.) 'Elsanta'

Grzegorz Mikiciuk, Małgorzata Mikiciuk

Dynamics of changes of starch and its components in fruitlets and maturing 'Jonagold' and 'Gala Must' apples

Maria Gawęda, Jan Ben

The influence of three seedling rootstocks on the growth and fruiting of peach trees in the first years after planting

Sławomir Świerczyński

Flower and fruit thinning effects on the development and quality of 'Šampion' apple fruits

Iwona Szot
